ROUTINE USE - LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE - DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grantor other benefit.

ROUTINE USE - DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of acontract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE WITHIN THE DEPARTMENT OF DEFENSE

A record from a system of records maintained by this component may be disclosed as a routine use to other components of the Department of Defense if necessary and relevant for the performance of a lawful function such as, but not limited to, personnel actions, personnel security actions and criminal investigations of the Component requesting the record.

ROUTINE USE - LAW ENFORCEMENT

In the event that a system of records maintained by this component to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation or order issued pursuant thereto.

ROUTINE USE - DISCLOSURE WHEN REQUESTING INFORMATION

A record from a system of records maintained by this component may be disclosed as a routine use to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grantor other benefit.

ROUTINE USE - DISCLOSURE OF REQUESTED INFORMATION

A record from a system of records maintained by this component may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of acontract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

ROUTINE USE WITHIN THE DEPARTMENT OF DEFENSE

A record from a system of records maintained by this component may be disclosed as a routine use to other components of the Department of Defense if necessary and relevant for the performance of a lawful function such as, but not limited to, personnel actions, personnel security actions and criminal investigations of the Component requesting the record.

**Categories of individuals covered by the system:** Any United States Air Force (USAF) member who is or might become a casualty

**Categories of records in the system:** Record of Casualty. This pertains to all personnel on active duty; personnel retired with pay; missing in action and captured personnel; Air Force Academy cadets; all Air Force Reserve and Air National Guard personnel performing authorized inactive duty for training or traveling directly to or from such place of duty; all Air Force Reserve Officers' Training Corps (AFROTC) applicants or members on annual training duty for 14 days or more or who are traveling to or from the designated place of such duty; certain civilian employees of the Air Force paid from appropriated funds who die while assigned overseas or who are on temporary duty from the Continental United States (CONUS) to overseas or who are traveling to or from the designated place of such duty under competent authority; certain unique situations on civilian employees and dependents of military personnel who die in mishaps while traveling aboard Military Airlift Command (MAC) or MAC-chartered flights or by other means of MAC oversea travel; and on certain civilian employees in the CONUS when death was the proximate result of their employment. Casualty Case File. Files pertaining to all officers and airmen on active duty or extended active duty (including personnel in absent without leave, desertion, or dropped from the rolls status); officers and airmen retired with pay; Air Force Academy cadets; all Air Force Reserve and Air National Guard officers and airmen performing authorized inactive duty for training or traveling directly to or from such place of duty; all AFROTC applicants or members on annual training duty for 14 days or more or traveling to or from the designated place of such duty; certain civilian employees of the Air Force paid from appropriated funds who die while assigned overseas or who are on Temporary Duty (TDY) from CONUS to overseas or who are traveling to or from the designated place of such duty under competent authority; certain civilian employees and dependents of military personnel who die in mishaps while traveling aboard MAC or MAC-chartered flights or by other means of MAC overseas travel; certain foreign nationals and certain employees in the CONUS when death was the proximate result of their employment. A casualty is defined as members of the armed forces and certain civilians who are lost to their organization by reason of having been declared dead, wounded, injured, or diseased. The casualty case file is comprised of messages pertaining to the member; a copy of the Record of Emergency Data; Air Force Military Personnel Center Form , CONUS death/Missing; Department of Defense Report of Casualty; copy of Assignment of Assistance Responsibility letter; Veterans Administration (VA) , Servicemen's Group Life Insurance Election; correspondence from the base/AFMPC to/from the next of kin (NOK); Air Force Form , Acknowledgement and/or Transfer of Casualty Assistance Case; AFMPC Casualty Documentation Record; Statement of Service; copy of notification message; Western Union messages; Mortuary messages; Report of Facts and Circumstances; autopsy; and other related correspondence and forms which pertain to the file. Record of Emergency Data (Being Maintained on all Air Force personnel on extended active duty (EAD) and Air Force Academy Cadets. Missing Persons Case Files. Reports submitted on United States Air Force (USAF) personnel who become missing as defined in Section 551, Chapter 10, Title 37, United States Code. Convenience rosters of those persons, copies of communications from and to next of kin, intelligence reports, items received through news media, some films.

**Authority for maintenance of the system:** Chapter 31, Title 44, United States Code (USC) 3101-3107, Records Management by Federal Agencies; Chapter 33, Title 44, USC 3301-3314, Disposal of Records; Title 10, USC 2771, Armed Forces - Accountability and Responsibility; ; Sections 555 and 556, Chapter 10, Title 37, United States Code, Pay and Allowances of the Uniformed Services, Payments to Missing Persons;

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Support of the Casualty Services Program. The information is used to assist the Air Force in effecting expeditious reporting, dignified and humane notifications, and efficient and thorough assistance to the next of kin of all casualties as previously defined. Primary user is the Air Force Casualty Division, Major Commands (MAJCOMs), and bases of assignment and/or reporting installation, Air Force (AF) Mortuary. Records contain histories of all known data surrounding the missing statuses, recording dealings with next of kin, and reflecting efforts to obtain all possible information through normal and intelligence channels as well as the results of those efforts. Contain record of personnel actions taken which involve the missing persons as well as actions taken in accordance with public law. Rosters are maintained for convenience of completing many actions. Primary users are personnel in the Casualty Division, Air Force Military Personnel Center. Decentralized segment is maintained for rapid response to queries by high-level personnel in the Washington, District of Columbia (DC) area. The Record of Emergency Data is used to show the names and addresses of service member's spouse, children, parents and other persons the member wants notified should he/she become a casualty. Serves as an official document required by law (Title 10, United States Code (USC) 2771) for designating beneficiaries for death gratuity and unpaid pay and allowances. Also used to designate a person to receive an allotment of pay if the member becomes missing, captured or interned. Primary user is the Casualty Division.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the sytem:**

**Storage:** Maintained in visible file binders/cabinets.

**Retrievability:** Filed by Name.

Filed by Social Security Account Number (SSAN).

**Safeguards:** Casualty records are accessible only to authorized personnel assigned to the Casualty Division. Personnel are on duty 7 days per week, 24 hours a day. Also, access to the building after duty hours is controlled by Security Police personnel.

**Retention and disposal:** Records are both temporary and permanent. They are retained in active file until the member's status is changed to deceased or returned to military control. One year after that time, selected temporary records are destroyed and all permanent records are retired to the National Personnel Records Center. Remaining temporary records are destroyed ten years after date of death or return to military control. Destroyed by shredding, burning, or by tearing into pieces.

**System manager(s) and address:** Assistant Deputy Chief of Staff, Personnel for Military Personnel, Air Force Military Personnel Center, Randolph Air Force Base, Texas 78148.

**Notification procedure:** Requests from individuals should be addressed to the Systems Manager.

**Record access procedures:** Requests from individuals should be addressed to: Air Force Military Personnel Center/Casualty Division (AFMPC/DPMC), Randolph Air Force Base, Texas 78148. If records have been retired, the request will be forwarded to National Personnel Records Center (NPRC). Written requests should contain the full name and Social Security Account Number of the member as well as an indentification as complete as possible of the desired material including, if known, its title, description, number, date and issuing authority. For personal visits, the individual must provide some acceptable identification; that is, drivers license, identification card, or give some verbal information that can be verified in the case folder.

**Contesting record procedures:** The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the Systems Manager.

**Record source categories:** Information provided by next of kin, organization of assignment, information extracted from Master Personnel Records, documents generated within the Casualty Division, Air Force Military Personnel Center, correspondence produced in providing casualty notification/assistance/processing.

**Categories of individuals covered by the system:** Records are maintained on officer and enlisted personnel that are projected or departed on Temporary Duty (TDY) in support of contingency deployment or manning assistance projects.

**Categories of records in the system:** Data maintained on individuals consists of 200 characters of data that fall into the following categories: Individual identification, skills, assigned organization, attached (TDY) organization and location, period and type of TDY, and projected completion date. Information is related only to the current performance of TDY of the individual on a specific project.

**Authority for maintenance of the system:** Title 44 United States Code, Section 3101 and Title 10 United States Code, Section 8032.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Data described herein represents only that portion of CPSC that contains individually identifiable data records. Other records in CPSC provide manpower authorizations to deploy personnel resources. The individual data provides the necessary information to insure that right numbers of personnel with the appropriate skills are projected/deployed in support of a contingency plan. Standard output programs summarize the individual data records and perform comparative routines to monitor the deploying force in relationship to the CPSC deployment manning document. Individual data records are provided to the CPSC via a magnetic tape file interface with the Advanced Personnel Data System (APDS). This file is provided on an as required frequency basis with production permissible as often as the APDS files are updated at the Major Air Command.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the sytem:**

**Storage:** Maintained on computer magnetic tapes.

Maintained on disks or drums.

**Retrievability:** Individual data records are not accessed nor displayed reflecting name or SSAN by standard CPSC programs. Retrieval programs available to Major Air Command personnel managers may be utilized to access individual data.

**Safeguards:** Records are accessed by person(s) responsible for servicing the record system in performance of their official duties.

Records are accessed by authorized personnel who are properly screened and cleared for need-to-know.

Records are controlled by computer system software.

**Retention and disposal:** Records are maintained only for the duration of the TDY period. Upon expiration of the TDY, records are programmatically deleted by the APDS.

The Central Data Processing facility for APDS is operated by the Directorate of Personnel Data Systems, Asst DCS/Personnel for Military Personnel, Headquarters USAF, Randolph AFB, TX, 78148. Remote terminals located within this 'Air Force Military Personnel Center' (AFMPC) complex permit authorized users access to the central data base. All Major Command headquarters (e.g., Hq Strategic Air Command, Hq Aerospace Defense Command) have access to a computer data base containing records on individuals assigned to their command. In addition, remote terminals located at Headquarters of the following Major commands provide direct access to the Central Data Base at Randolph AFB for update and retrieval of data: Hq Air Training Command/DPD, Randolph AFB, TX 78148; Hq Strategic Air Command/DPD, Offutt AFB, NE 68113; Hq Tactical Air Command/DPD, Langley AFB, VA 23365; Hq Aerospace Defense Command/DPD, Ent AFB CO 80912; Hq Air Force Logistics Command/DPM, Wright Patterson AFB OH 45433; Hq Air Force Systems Command/DPD, Andrews AFB, MD 20331; Hq Air University/DPD, Maxwell AFB, AL 38112; Headquarters Command/DPD, Bolling AFB, DC 20332; Hq Military Airlift Command/DPD, Scott AFB, Il 62225; Hq USAF Security Service/ DPD, San Antonio, TX 78243; Hq Air Force Communications Service/DPD, Richards-Gebaur AFB, MO 64030; Hq Air Force Reserve/DPD, Robbins AFB, GA 31093; Hq Pacific Air Force/DPD, APO San Francisco 96553; Hq United States Air Force Europe/DPD, APO New York 09012. Certain Air Force Staff Agencies, Separate Operating Activities and other specialized activities are provided

remote access to the Central Data Base as required to discharge their respective functions. Remote terminals to support these requirements are found at the following locations: The Forrestal Bldg,(AF/Surgeon General, AF/Judge Advococate) Washington DC 20314; The Pentagon, (AF/Director of Personnel Plans, AF/Director of Personnel Programs, AF/Reserve Personnel Division, National Guard Bureau/Air Personnel Division, AF/ Assistant for Colonels' Assignments) Washington DC 20330; Air Reserve Personnel Center, Director of Personnel Systems, 3800 York St, Denver, CO 80205; Washington Area Automated Data Processing Support Office/DPMDQ, Bolling AFB, DC 20332; Hq Air Training Command, Directorate of Student Resources, and Deputy Chief of Staff for Recruiting Service, Randolph AFB, TX 78148; Consolidated Base Personnel Offices (CBPO's) located at selected Air Force Bases around the world maintain computer data bases on persons for whom they have a servicing responsibility. In addition, CBPO's can request - by mail or the DOD Automatic Digital Network (AUTODIN) data from the Central Data Base at Randolph AFB, TX. CBPOs do not have direct remote access to the Central Data Base. Official mailing addresses of CBPOs are in the DOD directory in the Appendix to this systems notice. The three APDS processing echelons (Base, Major Command, and Hq USAF) are linked via AUTODIN into one vertical system. Data items are updated by the office and at the level having primary responsibility for the item in question. Data may be retrieved by the office and at the level having a validated requirement for access to it.

**Categories of individuals covered by the system:** All Air Force active duty military personnel.

Air Force Reserve personnel.
Air National Guard personnel.
Retired Air Force military personnel.
Air Force Academy cadets.

Certain surviving dependents of deceased members of the US Air Force and predecessor. Organizations; potential Air Force enlistees; candidates for commission enrolled in college. Level Air Force Reserve Officer Training Corps Programs; Deceased members of the Air Force and predecessor organizations; Separated members of the US Air Force, the Air National Guard (ANG) and Air Force Reserve (USAFR); ANG and USAFR Technicians.

**Categories of records in the system:** The principal digital record maintained at each APDS operating level is the master personnel record, which contains the following categories of information: 1. Accession data - that data which pertains to an individuals entry into the Air Force. Some examples are: Place of enlistment source of commission, home of record, date of enlistment, place from which ordered to EAD. 2. Education and training data, describing the level and type of education and training civilian or military - received by the data subject, for instance: academic education level, major academic specialty, professional specialty courses completed, professional military education received. 3. Utilization data - that information which is used in assigning and reassigning the individual, determining skill qualifications, awarding Air Force Specialty codes, determining duty location and job assignment, screening/selecting individual for overseas assignment, performing strength accounting processes, etc. Examples are: Primary Air Force Specialty code, Duty and Control Air Force Specialty Code, personnel accounting symbol, duty location, up to 24 previous duty assignments, aeronautical rating, date departed last duty station, short tour return date, reserve section, current/last oversea tour. 4. Evaluation Data - data relating to various evaluations performed on members of the Air Force during their career, for example: Officer Effectiveness Report dates and ratings, Airman Performance Report dates and ratings, results of various qualification tests, an 'Unfavorable Information' indicator, and Drug and Alcohol Abuse data. 5. Promotion Data - concerning an individual's promotion history, current grade and/or selection for promotion, e.g.: current grade, date of rank and effective date; up to 10 previous grades, dates of rank and effective dates; projected temporary grade, key 'service dates.' 6. Compensation data - although APDS does not deal directly with paying Air Force members, military pay is largely predicated on personnel data maintained in APDS and provided to the Air Force Accounting and Finance Center (AFAFC) as described in ROUTINE USES below. Among these data are: Pay date, Aviation Service Code, sex, grade, proficiency pay status. 7. Sustentation data - information dealing with programs provided or actions taken to improve the life, personal growth and morale of Air Force members. In this category are such items as: awards and decorations, marital status, number of dependents, religious denomination of member and spouse, race relations education. 8. Separation and retirements data, which identifies an individual's eligibility for and reason for separation, using items such as: date of separation, mandatory retirement date, projected or actual separation program designator and character of discharge. At the central processing site (AFMPC), a number of subsidiary files or processes are operated. Although some may be called 'systems', they are in fact integral parts of APDS, and function as such. 1. Procurement Management Information System (PROMIS) - is an automated system designed to enable the USAF to exercise effective management and control of the personnel procurement personnel required to meet the total scheduled manpower requirements necessary to accomplish the Air Force mission. The system provides the recruiter with job requirement data such as necessary test scores, Air Force Specialty Code, sex, date of enlistment; and the recruiter enters personal data on the applicant - SSAN, name, date of birth, etc. - to reserve the job for him or her. 2. Career Airman Reenlistment Reservation System (CAREERS) - is a selective reenlistment process that manages and controls the numbers by skill of first-term airmen that can enter the career force to meet established objectives for accomplishing the Air Force mission. A process and to recruit and enlist the quantity and quality of prior and non-prior service centralized data bank contains the actual number, by quarter, for each Air Force Specialty Code (AFSC) that can be allowed to reenlist during that period. The individual requests reenlistment by stating his eligibility (AFSC, grade, active military service time, etc). If a vacancy exists, a reservation - by name, SSAN, etc - will be made and issued to the CBPO processing the reenlistment. 3. Airman Accessions -provides the process to capture a new enlistee's initial personal data (entire personnel record) to establish that person's personnel data record and gain it to the Master Personnel File, whereby it will add to the strength of the Air Force. The initial record data is captured through the established interface with the Processing and Classification of Enlistees System (PACE) at Basic Military Training, Lackland AFB for non-prior service; For prior service enlistees the basic data (Name, SSAN, DOE, Grade, etc) is input directly by USAF Recruiting Service and updated and completed by the initial gaining CBPO. 4. Officer Accessions - is the process whereby each of the various Air Force sources of commissioning (AF Academy, AFROTC, Officer Training School, etc.) project their graduates in advance allowing management to select by skill, academic specialty, etc which and how many will be called to active duty when, by entering into the record an initial assignment and projected entry onto Active Duty date. On that date the individual's record is accessed to the active Master Personnel File and gained to the strength of the Air Force. 5. Technical Training Management Information System (TRAMIS) is a system dealing with the Technical Training activities controlled by Air Training Command. The purpose of the system is to integrate the training program, quota control and student accounting into the personnel data system. TRAMIS consists of numerous files which constitute 'quota banks' of available training spaces, in specific courses, projected for future use based on estimated training requirements. Files include such data as: Course Identification Numbers, Class Start and Graduation Dates, Length of Training, Weapon System Identification, Training Priority Designators, Responsible Training Centers, Trainee Names, SSAN (and other pertinent personnel data) on individuals scheduled to attend classes. 6. Training Pipeline Management Information System (TRAPMIS) is an automated quota allocating system which deals with specialized combat aircrew training and aircrew survival training. Its files constitute a 'quota bank' against which training requirements are matched and satisfied and through which trainees are scheduled in 'pipeline' fashion to accommodate the individual's scheduled geographical movement from school to school to end assignment. Files contain data concerning the courses monitored as well as Names, SSAN's and other pertinent personnel data on members being trained. 7. Air Force Institute of Technology (AFIT) Quota Bank File. This file reflects the AFIT program quotas by academic specialty for each fiscal year (current plus two future fiscal years, plus the past fiscal year programs for historical purposes). Also, this file reflects the total number of quotas for each academic specialty. Officer assignment transactions process against the AFIT Quota Bank file to reflect the fill of AFIT Quotas. Examples of data maintained are: Academic Specialty, Program Level, Fiscal Year, Name of Incumbent selected, projected, filling AFIT Quota. 8. Job File. The Job File is derived from the Authorization Record and is accessible by Position Number. Resource managers can use the Job File to validate authorizations by Position Number for assignment actions and also to make job offers to individual officers. Internal suspensing within the Job File occurs based upon Resource Managers update transactions. Data in the file includes: Position Number, Duty AFSC, Functional Account Code, Program Element, Location, and name of incumbent. 9. Casualty subsystem is composed of a number of transactions which may be input at Headquarters Air Force and/or CBPO's to report death or serious illness of members from all components. A special file is

V 40 160 AUG 18 75 XUM

maintained in the system to record various information on individuals on whom death has occurred. Besides basic identification data unique data such as country of occurrance, date of incident, casualty group, aircraft involved in the incident and military status are recorded and maintained in this file. 10. Awards/Decorations: Awards/Decorations are recorded and maintained on all component personnel in the headquarters Air Force master files. All approved decorations are input at CBPO's whereas disapproved decorations are input at MAJCOM/HAF. A decorations statistical file is built at AFMPC which reflects an aggregation of approvals/disapprovals by category of decoration. This file does not reflect any individually identifiable data. All individually identifiable data on decorations is maintained in the Master Personnel File. Such information as the type of decoration, awarding authority, special order number and date of award are identified in an individuals record. Seven occurances for all decorations are stored; however only specific data on the last decoration of a particular type is maintained. 11. Point Credit Accounting and Reporting System (PCARS). This system is an Air National Guard/Air Force Reserve Unique supported by APDS. Its basic purpose is to maintain and account for retirement/retention points accrued as a result of participating in Drills/ Training. The system stores basic personal identification data which is associated with a calendar of points earned by participation in various elements of the Reserve program. Each year an individuals record is closed and point totals are accumulated in history, and a point earning statement is provided the individual and various records custodians. 12. Human Reliability/Personnel Reliability File: This file is maintained at Headquarters Air Force in support of AFM 35-98 and AFR 35-99. It is not part of the Master Personnel Files but a free standing file which is updated by transactions from CBPO's. The file was established to specifically identify individuals who have become permanently disqualified under the provisions of the above regulations. A record is maintained on each disqualified individual which includes basic identification data, service component, Personnel/Human reliability status and date, and reason for disqualification. 13. Variable Incentive Pay (VIP) File for medical officers: Contains about 125 character record on all Air Force physicians and is specifically used to identify whether the individual is participating in the Continuation Pay or Variable Incentive Pay programs. Update to this file is provided by the Surgeon (AFMPC), the Air Force Accounting and Finance Center and directly from changes to the Master Personnel File. Besides basic identification data an individual's record includes source of appointment, graduate medical location status. amount of VIP or Continuation Pay and the dates of authorization and the dates and reason for separation. 14. Board Support: 14a. The Board Support Subsystem provides complete automated support for USAF Central Selection and nomination boards. It identifies eligible officers, generates board-support products, historical and analytical outputs, post-board analysis and selection documents, and accommodates board scoring operations. A Selection Brief contains basic identification data, TDY history, overseas history, decoration history, duty history, grade history and all applicable service dates. 14b. Before Central Temporary Promotion Selection Boards, AFMPC data is flowed to base level for generation of Officer Pre-Selection Briefs, thus permitting the individual to review the data that will be presented to the board. AFMPC also produces selection briefs that are provided to MAJCOMs for secondary zone nomination boards. To permit equitable consideration of all officers the system generates a board-following tool which predicts the board score the individual can be expected to attain. 15. Weighted Airman Promotion System: (a) The Test Scoring and Reporting Subsystem (TSRS) encompasses: Identifying at the CBPO individuals eligible for testing: providing output to the Base Test Control Officer and the CBPO to control, monitor, and operate WAPS testing functions; editing and scoring WAPS test answer cards at AFMPC; providing output for maintaining historical and analytical files at AFMPC and the Human Resources Laboratory (HRL) and includes the central identification at AFMPC of individuals eligible for testing. (b) The Personnel Data Reporting Subsystem (PDRS) provides for: identifying promotion eligibles at AFMPC; verifying these eligibles and selection promotion data; merging test and weighted promotion data at AFMPC to effect promotion scoring, assigning the promotion objective and aligning selectees in promotion priority sequence; maintaining projections on promotion selectees at AFMPC, MAJCOM, and the CBPO; updating these projections monthly; creating output products to monitor the flow of data in the system; maintaining promotion historical and analytical files and reports at AFMPC. (c) Basically, identification data along with time in grade, test scores, decoration information, time in service, and airman performance report history is used to support this program. 16. Retired Personnel Data System (RPDS) is made up of four files - Retired Officer Management File and Retired Airman Management File containing records on members in retired status and the Retired Officer and Airman Loss Files containing records on former retirees who have been lost from rolls, usually through death. The RPDS is used to produce address listings for the Retired Newsletter and Policy letter, statistical reports for budgeting, to manage the Advancement Program, the Temporary Disability Retired List, Age 59 rosters for ARPC, General Officer roster, and statistical digest data for management analysis functions. Data is extracted from the master files upon retirement from Active Duty or Reserves. Data includes: Name, SSAN, Grade data, service data, Education data, Retirement data and address. 17. Separated Officer File contains historical information on officers who leave the Air Force via separation, retirement, or death. Copies are sent to Human Resources Lab and Washington offices for research purposes. The data comprises the Master Personnel Record in its entirety and is captured 30 to 60 days after separation from the Air Force. 18. Airman Gain/loss File includes data extracted from the Airman Master file when accession and separation (gains and losses) occur. This file, like the Separated Officer File, is used for historical reports regarding strength changes. Data includes Name, SSAN, and other data that reflects strength, i.e., promotions, reassignment data, specialty codes, etc. 19. Officer and Airman Separation Subsystem is used to process, track, approve, disapprove and project separations from the Air Force and transfers between components of the Air Force. This subsystem uses the Active, Guard, and Reserve MPFs. Data used includes that specifically related to separations, e.g., Date of Separation, Separation Program Designator, waivers, etc. 20. The Retirements Subsystem is used to process and track applications for and approval/ disapproval and projections of retirements. This subsystem uses the Master Files for Active Duty and Reserve officers and airmen. Data specifically related to retirements includes application data, date of separation, waiver codes, disapproval reason codes, Separation Program Designator, Title 10 United States Code section, etc. 21. Retired Orders Log is generated by the computer-produced retirement orders routine. Orders are automatically produced when approval, verification of service dates, and physical clearance have been entered in system. The orders log contains data found in administrative orders for retirement, including name, SSAN, grade, order number, effective dates, etc. The log is used to control assignment of order number, and as a cross-reference between orders, revocations, and amendments. 22. General Officer Subsystem of APDS. The General Officer Subsystem of APDS contains data extracted from the Master Personnel File and language qualification data and assignment history data maintained by the Assistant for General Officer matters. A record is maintained on each general officer and general officer selectee. The general officer files is updated monthly and is used to produce products used in the selection/identification of general officers for applicable assignments. 23. Officer Structure Simulation Model (OSSM). The Officer Structure and Simulation Model is a capability which provides officer force descriptions in various formats for existing, predictive or manipulated structures. It functions as a planning tool against which policy options can be applied so as to determine the impact of such policy decisions. The OSSM input records contain individual identifiable data from the Master Personnel Record, but all output is statistical. 24. Widow's File. This file is maintained on magnetic tape and updated by the Office of Primary Responsibility. When required, address labels and listings are produced by employing selected APDS utility programs. The address labels are used to forward the Retired Newsletter to widows of active duty and retired personnel. The listings are used for management control of the program. Contained in the file are the name, address, and SSAN of the widow. Additionally, the deceased sponsor's name, SSAN, date of death, and status at time of death are maintained. 25. Historical Files. Files with a retention period of 365 days or more are designated historical files. They consist of copies of active master files, and are used primarily for aggregation and analysis of statistical data, although individual records may be accessed to meet ad hoc requirements. 6.. Miscellaneous files, records, and processes. In this category are a number of work files, inactive files with a less-than-365-day retention period, intermediate records, and processes relating to statistical compilations, computer operation, quality control and problem diagnosis. Although they may contain individual-identifying data, they do so only as a function of system operation, and are not used in making decisions about people.

**Authority for maintenance of the system:** 10 USC, Chapter 11, Reserve Components, Section 265 - policies and regulations: participation of reserve officers in preparation and administration; 269 - Ready reserve: placement in; transfer from; 275 - Personnel records; 278 - Dissemination of information. 10 USC Chapter 13, The Militia, Section 279 - Training Reports. 10 USC, Capter 31, Enlistments, Sections 504 - Persons not qualified; 505 - Regular components: qualifications, term, grade; 506 - Regular components: extension of enlistments during war; 507 - Extension of enlistment for members needing medical care or hospitalization; 508 - Reenlistment: qualifications: 509 - Voluntary extension of enlistments: periods and benefits; 510 - Reserve components: qualifications; 511 - Reserve components: terms; 512 - Reserve components: transfers. 10 USC Chapter 33, Appointments in Regular Components, Section 564 - Warrant officers: effect of second failure of promotion. 10 USC Chapter 35, Appointments as Reserve Officers, Section 593 - Commissioned officers: appointment, how made; term. 10 USC Chapter 37, General Service Requirements, Section 651 - Members: required service. 10 USC Chapter 39, Active Duty, Sections 671 - Members not to be assigned outside US before completing training; and 673 - Ready reserve. 10 USC Chapter 47, Uniform Code of Military Justice, Sections 835 - Art. 35. 9345 - Selection of Filipinos. 32 USC Chapter 1, Organization, sections 102 - General policy; and 104 - units: location; organization; command. 32 USC Chapter 3, Personnel, Section 307 - Federal recognition of officers: examination, certification of eligibility. 32 USC Chapter 7, Services , supplies, etc., Section 709 - Caretakers and clerks. 37 USC Chapter 3, Basic Pay, Section 308 - Special pay: reenlistment bonus; 313 - Special pay: medical officers who execute active duty agreements. 37 USC Chapter 7, Allowances, Section 407 - Travel and transportation allowances: dislocation allowance. 37 USC Chapter 10,

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** The Air Force operates what is essentially a centralized personnel management system in an environment that is widely dispersed geographically and encompasses a population that is quite diverse in terms of qualifications, experience, military status and needs. There are three major centers of Air Force personnel management: Washington, D.C., where most major policy and long-range planning/programming decisions are made; the Air Force Military Personnel Center at Randolph AFB, Tx., which performs most personnel operations-type functions for the active duty components of the force; and the Air Reserve Personnel Center at Denver Co., which performs certain operational functions for the Reserve components of the force. Offices at Major Command Headquarters, State Adjutant General, and Air Force Bases perform operational tasks pertaining to the population for which they are responsible. The structure of the Air Force and its personnel management system, the composition of the force, and the Air Force's stated objective of treating its people as individuals, i.e., giving due consideration to their desires, needs and goals, demand a dynamic data system that is capable of supporting the varying needs of the personnel managers at each echelon and operating locations. It is to this purpose that the data in the Advanced Personnel Data System is collected, maintained, and used. A. ROUTINE USES WITHIN THE AIR FORCE - INTERNAL TO THE PERSONNEL COMMUNITY: HQ USAF, WASHINGTON, DC: Deputy Chief of Staff, Personnel and his immediate staff; Director of Personnel Plans; Director of Personnel Programs; Assistant for General Officer Matters; Assistant for Colonel Assignments; Reserve Personnel Division; Air National Guard Personnel Division; and The Surgeon General, the Chief of AF Chaplains and the Staff Judge Advocate, each of which perform certain Personnel functions within their area of responsibility. Data from the central data base at the AFMPC is furnished Washington area agencies by retrieval from the computer at Randolph via remote access devices and by provision of recurring products containing required management information, including computer tape files which are used as input to unique systems with which APDS interfaces. Although most of the data is used by policy makers to develop long-term plans and programs and track progress toward established goals, some individual data is provided/retrieved to support actions taken on certain categories of persons managed by offices in the headquarters e.g. General Officers, Colonels, Air National Guard personnel, etc. AIR FORCE MILITARY PERSONNEL CENTER (AFMPC), RANDOLPH AFB, TX. Personnel managers at AFMPC use the data in APDS to make decisions on individual actions to be taken in areas such as personnel procurement, education

and training, classification, assignment, career development, evaluation, promotion, compensation, casualty and personal affairs, separation and retirement. AIR RESERVE PERSONNEL CENTER (ARPC), DENVER, COLORADO. Personnel managers at ARPC perform many of the same functions for the Reserve components of the Air Force as the managers at AFMPC perform for the active duty force. As with the Washington area, ARPC obtains data from the central data base at AFMPC by retrieval through remote terminals and recurring output products containing information necessary to their management processes. MAJOR COMMAND HEADQUARTERS. Standard major command headquarters personnel operations are supported by the standard content of APDS records provided them by AFMPC. In addition, there is provided in the APDS record an 'add-on area' which the commands are authorized to use for the storage of data which will assist them in fulfilling unique personnel management requirements generated by their mission, structure, geographical location, etc. The standard functions performed fall generally under the same classifications as those in AFMPC, e.g., assignment, classification, separation, etc. Non-standard usages include provisions of unique aircrew data, production of specially-tailored name listing, control of theatre oriented training, etc. Some commands use APDS data - both standard and add-on as input to unique command systems, which are seperately described in the Federal Register. CONSOLIDATED BASE PERSONNEL OFFICES (CBPO). CBPOs, which represent the base-level aspect of APDS, are the prime point of system-to-people interface. Supplied with a standard data base and system, CBPOs provide personnel management support to commanders and supervisors on a daily basis. Acting on receipt of data from higher headquarters, primarily by means of transactions processed through APDS, they notify people of selection for reassignment, promotion, approval/disapproval of requests for separation and retirement, and similar personnel actions. When certain events occur on an individual at the local level, e.g., volunteer for overseas duty, reduction in grade, change in marital status, application for retirement, etc., the CBPO enters transactions into the vertical system to transmit the requisite information to other management levels and update the automated records resident at those levels. CBPOs too are allotted an 'add-on' area in the computer record which they use to support local management unique requirements such as local training scheduling, unique locator listing, urinalysis testing scheduling, etc. B. ROUTINE USES WITHIN THE AIR FORCE - EXTERNAL TO THE PERSONNEL COMMUNITY 1. HEADQUARTERS USAF/AFMPC INTERFACES: Automated interfaces exist between the APDS central site files and the following systems of other functions: a. The Flight Records Data System (FRDS) maintained by the Air Force Inspection and Safety Center (AFISC) at Norton AFB, CA. (1) Certain personnel identification data on rated officers is transferred monthly to the FRDS. This data flow creates the basic identifying data in the FRDS, insures compatability with the APDS, and precludes duplicative data collection and input generation by the AFISC. (2) Update of the personnel data to the FRDS generates return flow of flying hour data which is used at AFMPC for rated resource distribution management. b. The Master Military Pay Account (MMPA), is the Joint Uniform Military Pay System (JUMPS) centralized pay file maintained by the Air Force Accounting and Finance Center (AFAFC) at Denver, CO. The APDS transfers certain pay related data as changes occur to update the MMPA, e.g., promotions, accessions, separations/retirements, name, SSAN, grade. These data provide criteria for the AFAFC to determine specific pay entitlements. c. The AFAFC maintains a separate pay system for Air National Guard and Air Force Reserve personnel called the Air Reserve Pay and Allowances System (ARPAS). (1) APDS outputs certain pay related data to ARPAS as changes occur, e.g., retirements/ separations, promotions, name, SSAN, grade. These data form the criteria for the AFAFC to determine specific Reserve pay entitlements. (2) ARPAS outputs data which affect accumulated point credits for Air National Guard/ Reserve participation to AFMPC for update of the Point Credit Accounting and Reporting System (PCARS), a component of APDS. PCARS also receives monthly input from Hq Air University which updates point credits as a result of completing an Extension Courses Institute correspondence program. d. AFAFC provides data on Variable Incentive Pay (VIP) for Medical Officers which is used to update a special control file within APDS and produce necessary reports for management of the VIP program. e. Air Training Command operates a system called PACE (Processing and Classification of Enlistees) at Lackland AFB TX. From that system data is fed to AFMPC to initially establish the APDS record on an Air Force enlistee. f. On a monthly basis, copies of the APDS master Personnel File are provided to the Human Resources Laboratory at Brooks AFB, TX, where they are used as a statistical data base for research purposes. g. On a quarterly basis, AFMPC provides the USAF School of Aerospace Medicine with data concerning name, SSAN and changes in base and command of assignment of flying personnel. The data reflects significant medical problems in the flying population. h. A complete printout of APDS data pertaining to an individual is included in his Master Personnel Record when it is forwarded to National Personnel Records Center. i. APDS data is provided to the Contingency Planning Support Capability (CPSC) at seven major command headquarters: Tactical Air Command, Strategic Air Command, Military Airlift Command, Aerospace Defense Command, Air Force Communications Service, United States Air Forces, Europe, and Pacific Air Forces. A record identifiable by individual's name and SSAN provides contingency and/or manning assistance temporary duty (TDY) being performed by the individual. Record is destroyed upon completion of the TDY. Statistical records (gross statistics by skill and unit) are also generated for CPSC from APDS providing force availability estimates. CPSC is described separately in the Federal Register. 2. BASE LEVEL (CBPO) INTERFACES: Certain interfaces have been established at base level to pass data from one functional system to another. The particular mode of interface depends on the needs of the receiving function and the capabilities of the system to produce the necessary data: a. The Flight Management Data System (FMDS) receives an automated flow of selected personnel data on flying personnel as changes occur. This data consists primarily of assignment data and service dates which the base flight manager uses to determine appropriate category of aviation duty which is reflected by designation of an Aviation Service Code. The FMDS outputs aviation service data as changes occur to the BLMPS. These data subsequently flow to the APDS central site files at AFMPC so it is available for resource management decisions. b. The Medical Administration Management System (MAMS), currently being developed and tested, will receive flow of selected assignment data as changes occur for personnel assigned to medical activities. MAMS will use these data to align assigned personnel with various cost accounting work centers within the medical activity and thus be able to track manpower expenditure by sub-activities. c. The Automated Vehicle Operator Record (AVOR) is being developed to support motor vehicle operator management. Approximately 115 characters of vehicle operator data will be incorporated into the BLMPS data base for both military and civilian personnel authorized to operate government motor vehicles and selected personnel data items (basic identification data)will be authorized for access by the vehicle operator managers. d. Monthly, a magnetic tape is extracted from BLMPS containing selected assignment data on all assigned personnel. This tape is transferred to the base Accounting and Finance Office for input into the Accounting Operations System. This system uses these data to derive aggregate base manpower cost data. e. A procedure is designed into BLMPS to output selected background data in a predefined printed format for personnel being administered military justice. This output is initiated upon notification by the base legal office. The data is forwarded to the major command where it is input into the Automated Military Analysis and Management System (AMJAMS). f. The BLIMPS output - on an event-oriented basis - pay-affecting transactions such as certain promotions, accessions, and assignments/reassignments, to AFAFC, where the data is entered into the JUMPS. C. ROUTINE USES EXTERNAL TO THE AIR FORC. . TO THE OFFICE OF THE SECRETARY OF DEFENSE (OSD). Individual information is provided to offices in OSD on a recurring basis to support top-level management requirements within the Department of Defense. Examples are the DOD Recruiter File to the Assistant Secretary for Manpower and Reserve Affairs (M&RA), a magnetic tape extract of military personnel records (RCS: DDM(SA)1221) to M&RA, input to the Reserve Component Common Personnel Data System to M&RA, and the Post Career Data File to M&RA. 2. TO OTHER DEFENSE AGENCIES. APDS supports other components of DOD by provision of individual data in support of programs operated by those agencies. Examples are the Selected Officer List to the Defense Intelligence Agency for use in monitoring a classified training program and the Defense System Management School (DSMS) Track Record System to DSMS for use in evaluating the performance of graduates of that institution. An extract file on Air National Guard Technicians is provided the National Guard Computer Center. 3. OTHER GOVERNMENT/QUASI-GOVERNMENT AGENCIES. Information used in analysing officer retention is provided RAND Corporation. Data on prior service personnel with military service obligations is forwarded to the National Security Agency. Lists of officers selected for promotion and/or appointment in the Regular Air Force are sent to the Office of the President and/or the Congress of the United States for review and confirmation. Certain other personnel information is provided these and other government agencies upon request when such data is required in the performance

of official duties. Selected personnel data is provided foreign governments, US governmental agencies, and other Uniformed Services on USAF personnel assigned or attached to them for duty. Examples: the government of Canada, Federal Aviation Administration, US Army, Navy, etc.) 4. LITIGATION. Information from APDS may be used in litigation in the event that the United States, its officers, or its employees are involved in the ligigation. 5. MISCELLANEOUS. Lists of individuals selected for promotion or appointment, who are being reassigned, who die, or who are retiring are provided to unofficial publications such as the Air Force Times, along with other information of interest to the general Air Force public. Information from APDS support a world-wide locator system which responds to queries as to the location of individuals in the Air Force. Material for preparing mailing labels is furnished commercial publishing or mailing firms working under contract to the Air Force who print or mail quasi-official publications to specified portions of the Air Force population, e.g., retired personnel, widows, etc.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the sytem:**

**Storage:** Maintained in visible file binders/cabinets.
Maintained in card files.
Maintained on computer magnetic tapes.
Maintained on disks or drums.
Maintained on computer paper printouts.
Maintained on microfiche.

**Retrievability:** Filed by Name.
Filed by Social Security Account Number (SSAN).
Filed by other identification number or system identifier.

The primary individual record identifier in APDS is SSAN. Some files are sequenced and retrieved from by other identifiers; for instance, the assignment action record is identified by an assignment action number. Additionally, at each echelon there exists computer programs to permit extraction of data from the system by constructing an inquiry containing parameters against which to match and select records. As an example, an inquiry can be written to select all Captains who are F-15 pilots, married, stationed at Randolph AFB, who possess a master's degree in Business Administration; then display name, SSAN, number of dependents and duty location. At AFMPC and CBPO, there is the added capability of selecting an individual's record or certain pre-formatted information by SSAN on an immediate basis using a teletype or cathode ray tube display device. High-speed line printers located in the Washington DC area and at ARPC permit the transmission of high volume products to and for the use of Personnel managers at those locations.

**Safeguards:** Records are accessed by custodian of the record system.

Records are accessed by person(s) responsible for servicing the record system in performance of their official duties.

Records are accessed by authorized personnel who are properly screened and cleared for need-to-know.

Records are accessed by commanders of medical centers and hospitals.

Records are stored in security file containers/cabinets.
Records are stored in safes.
Records are stored in vaults.
Records are stored in locked cabinets or rooms.
Records are protected by guards.
Records are controlled by personnel screening.
Records are controlled by visitor registers.
Records are controlled by computer system software.

**Retention and disposal:** Retained in office files until superseded, obsolete, no longer needed for reference, or on inactivation, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning.

Preceding retention statement applies to Analog output products of the Advanced Personnel Data System. Data stored digitally within system is retained only for the period required to satisfy recurring processing requirements and/or historical requirements. Files with a retention period of 364 days or less are automatically released at the end of their specified retention period. 'Permanent history' files are retained for 10 years. Files 365 or more days old are defined as 'historical files' and are not automatically released. Retention periods for categories of APDS files are as follows: If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next daily, then the retention will be not greater than 10 days. If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next daily, which is also used for processing of weekly runs, then the retention will be not greater than 20 days. If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next weekly, then the retention will be not greater than 20 days. If cycle in which a program or series of programs creating output is daily, and the created-magnetic tape file will be used for processing of next weekly, which is also used for processing of monthly runs, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is weekly, and the created magnetic tape file will be used for processing of next weekly, then the retention will be not greater than 20 days. If cycle in which a program or series of programs creating output is weekly, and the created magnetic tape file will be used for processing of next weekly, which is also used for processing of monthly runs, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of quarterly runs, then the retention will be not greater than 90 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of Semi-Annual run, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is monthly, which is also used for processing of annual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, then the retention will be not greater than 90 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of semi-annual run, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of anannual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of next semi-annual, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of next semi-annual, which is also used for processing of annual runs, then the retention will be not greater than 365 days. created magnetic tape file will be used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of next annual, then the retention will be not greater than 365 days. 9If cycle in which a program or series of programs creating output is semi-annual, and the If cycle in which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of next annual, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If the program or series of programs creating output is a one time run, and the file will be used for processing as required, then the retention will be lowest possible retention commensurate to job completion. **Authority for maintenance of the system:** 44 United States Code 3101

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Purpose of PACE is to create an initial record for the base level personnel data system (BLMPS); to provide AFMPC with initial accession information on non-prior service enlistees provide for improved classification and assignment procedures using computer processes; provide necessary information to joint military pay system (JUMPS) and Lackland Entering Pay System (LEAPS) for establishment of military pay records; interface the data ring process to the maximum extent with other functional areas; and to standardize and simplify personnel processing for the 3700 personnel processing group (ATC), Lackland AFB, TX 78236, so that they may more effectively control record preparation, processing, and classification actions necessary to transition civilian enlistees to military status. Aptitude tests are administered; biographical history and job and assignment preferences are collected; and personal data is collected from enlistment records to establish a mechanized record necessary to support classification and assignment of trainees. Accession and update data is furnished through automatic interface to the advanced personnel data system (APDS) at AFMPC and Air Training Command, Randolph AFB, TX; to JUMPS at AFAFC, Denver, CO. and to LEAPS at accounting and finance, Lackland AFB, TX. History records are furnished monthly to the human resources laboratory (HRLPRD), personnel research division, Lackland AFB, TX, for statistical analysis and to USAF Recruiting Service/RSS, Randolph AFB, TX, for use in the enlistee quality control monitoring system. Data is used to prepare forms, processing schedules, reassignment and promotion orders, classification actions, transaction and error rosters, autodin lists, and management products necessary to administer trainees while at Lackland AFB, TX. Standard BLMPS products such as JUMPS transaction registers, strength balance reports, and suspense lists are prepared. Changes in basic data, promotions, reassignments, separations, and duty status changes are reported to APDS, JUMPS, and LEAPS as the action occurs. History records used at HRLPRD and the enlistee quality control monitoring system are augmented by additional data from APDS and technical training centers and are used to evaluate the quality of Airmen enlisted in the USAF and the effects of changes in procurement and classification policies.

**PRIVACY ACT OF 1974**

**On December 31, 1974, President Ford signed Public Law 93-579, (88 Stat. 1896) which added section 552a to title 5 of the United States Code. This new section is known as the Privacy Act of 1974. The act reasserts the fundamental right to privacy as derived from the Constitution of the United States and provides a series of basic safeguards for the individual to prevent the misuse of personal information by the Federal Government.**

**The Privacy Act provides for making known to the public the existence and characteristics of all personal information systems kept by every Federal agency. The act permits an individual to have access to records containing personal information on that individual and allows the individual to control the transfer of that information to other Federal agencies for nonroutine uses. The act also requires all Federal agencies to keep accurate accountings of transfers of personal records to other agencies and outsiders, and to make the accountings available to the individual. The act further provides for civil remedies for the individual whose records are kept or used in contravention of the requirements of the act.**

**The Privacy Act also requires the agencies to adopt regulations that list and describe routine transfers of their personal records and to establish procedures for access to and amendment of such records.**

**Compilation**

**The Office of the Federal Register is required to publish an annual compilation of all Privacy Act rules and notices. Although the compilation will not be available until some time after September 27, 1975, readers may assemble their own compilation by cummulating Privacy Act material as it is published. To facilitate this, all Privacy Act notices and final rules will be published in separate Parts of the FEDERAL REGISTER which may easily be detached and combined.**

**System location:** Headquarters AFSC Deputy Chief of Staff/Personnel Andrews Air Force Base MD 20334.

**Categories of individuals covered by the system:** All active duty Air Force military assigned to this Command.

**Categories of records in the system:** All standard Air Force data items from the advanced personnel data system (APDS) are included in this file as well as the following unique data items: assignment vulnerability code, assignment vulnerability date, personnel gain-loss indicator, merge record status, summary indicator, professional potential index (Officer).

**Authority for maintenance of the system:** 10 United States Code 8034.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Information in this system is used to provide personnel resources managers with information in addition to standard APDS data that will enhance assignment actions and insure effective utilization of personnel in the Command. This file merges Officer and enlisted data to provide a total military manning picture for Air Force Systems Command (AFSC) units. It is also used to screen personnel completing minimum tours in AFSC. Resource managers use the file to identify the type of gain or loss actions pending on an individual such as intra-Command moves, promotions, changes to current duty area. The professional potential index (PPI) is used where a gross indicator of personnel quality or potential is needed such as determining parity of quality manning within field organizations, affecting future assignment actions, trackin individual board member performance in below the zone promotion boards, to insure fair consideration for below the zone candidates. The PPI provides a single quantitative representation of the whole man. The PPI is primarily based on adjusted effectiveness report data which has been adjusted for inflation, currency, period of supervision, and period of time covered by the computer file. It also

includes the influence of academic and professional military education, aeronautical rating, service component, source of commission, promotion status, date of separation, and age. This data is all taken from standard personnel information files in APDS. The information helps resource managers and Commanders insure a precise quality distribution of the personnel resource necessary to accomplish the unique mission of scientific research and development of Air Force Systems Command. The data is only available to personnel resource managers and Commanders in AFSC. No other agency has access to this data, therefore, there are no routine uses of the data outside AFSC.

**System name:** 03501X0OTAYZA Management Control System (MCS )

**System location:** Administrative/Personnel Support Office, Room 1D158, Air Force Data Services Center, AFDSC/CEA, Pentagon, Washington, D.C. 20330. Training Team, Office of Plans and Management, Room 1C1041, Air Force Data Services Center, AFDSC/XMT, Pentagon, Washington, D.C. 20330.

**Categories of individuals covered by the system:** All Air Force active duty military personnel.

Air Force civilian employees.

**Categories of records in the system:** Types of records listed in MCS are those associated with a locator file, i.e., the individual's name, home address, home phone, etc. Also contained are records relating to the office the individual is assigned to; their authorized and assigned grade; date they were assigned to this organization; for military personnel only, the date they will depart; who their supervisor is; and the individual's duty phone and his immediate supervisor's duty phone. This also contains training information for military and civilian personnel assigned to AFDSC. This information consists of course completions by date.

**Authority for maintenance of the system:** At the present time there is no statute or executive order applicable to such a system of records as the MCS file.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** The MCS system was established as a management tool to provide office managers with information concerning their overall manpower picture to aid them in scheduling workload requirements in support of this organization's assigned mission. This system also acts as a Central Locator File and also allows a variety of manpower reports to be produced. b. Anticipated users of the MCS system: (1) Commander, Air Force Data Services Center. (2) Directors and Divisions Chiefs, Air Force Data Services Center. (3) Administrative personnel assigned to the Office of Administrative/Personnel Support function, Air Force Data Services Center, and training personnel assigned to Training Team, Office of Plans and Management. (4) Civilian agencies and other government agencies. (Specific names and government branches cannot be identified since the system acts as a locator file for individuals assigned to AFDSC. Any civilian agency or government branch could request information concerning an individual in order to locate that individual at their place of duty or at home.) (5) Military and Civilian Personnel Offices assigned to the 1143rd Air Base Squadron Pentagon, Washington, D.C. c. Specific use of information by each of the users mentioned in paragraph 8b. (1) The Commander, AFDSC uses the information from the MCS system to keep informed of the current manpower authorizations within AFDSC and were individuals are assigned. This is also true for Directors and Division Chiefs in AFDSC. From this information the AFDSC workload is closely managed to meet requirements by customers that this organization supports. In addition, the Commander, Directors and Divisions Chiefs can request a variety of manpower information from this system when certain data fields are aligned. (2) The administrative personnel assigned to the Administrative personnel support function mainly use the informmation supplied from MCS as a Central Locator file in order to assist outside callers in locating offices and individuals of this organization. Training Personnel use this file to provide cost estimates for input to the annual budget preparations for this organization. (3) The information provided to civilian and government agencies would be upon request to locate an individual assigned to AFDSC. (4) Civilian and Military personnel offices are provided information in report form. In most cases this information conncerns number of personnel assigned against number authorized, or the number of personnel assigned in a particular grade. Each of these offices can request other inquiries concerning personnel for which the MCS can, in most cases, provide the answers to their questions.
